COOLMAX®

ergowell

Technical Data

- Height: • 20 cm or 15 cm for the **ergowell**light
- Core:
- Innovative wave contours for ergonomic body support
 - 10 cm high-quality supporting cold foam, 5 cm in thinner areas, density 55 kg/m³
 - 10 cm high-quality pressure-relieving visco foam, 5 cm in thinner areas, density 55 kg/m³
 - 5 cm high-quality micro-pocket spring core with over 730 deluxe springs for ideal ventilation and optimal restoring forces in the mattress so that you can easily change your ideal lying position
 - Maximum sleeping comfort due to pressure-relieving properties of the **ergovital**® visco foam, which enhances the blood circulation
 - Intelligent foam material that adjusts itself to body heat
 - Irregular, open cell structure, making it breathable
 - without micro-pocket spring core in the middle section
- Cover:
- Two-sided zip fastener, removable and washable at up to 60 °C
 - High-quality, atmosphere-regulating Coolmax cover that is kind to your skin, regulates moisture and allows air through, thus reducing perspiration
 - This innovative cover increases the comfort of your lying position and provides for ideal moisture transport in both summer and winter, thus ensuring maximum air circulation
